Introduction

"the force which moves electrons in their ellipses about the nuclei of atoms is the same force which moves our earth in its annual course about the sun, and is the same force which brings to us the light and heat which makes life possible on this planet."

- Albert Einstein on "Unification"

ORDER/COSMOS

More/Less

- SEVEN major musical notes:

C, D, E, F, G, A, B

- SEVEN types of EM radiation:

Radio waves, Microwaves, Infrared, Visible *light*, Ultraviolet, X-rays and Gamma rays.

(Electrical power, telephone waves and Cosmic rays)

- SEVEN colors of the Rainbow:

Red, Orange, Yellow, Green, Blue, Indigo, Violet/White

- **SEVEN rows (periods) in the Periodic Table:**

Atomic orbitals, bands etc.

- **SEVEN Spectral types/lines of Stars:**

Most stars are currently classified under the Morgan-Keenan (MK) system using the letters O (Red), B (Orange), A (Yellow), F (Yellow/White), G (White), K (Blue/White), and M (Blue), a sequence from the hottest (O type) to the coolest (M type).

- **SEVEN Ring Groups of Planet Saturn:**

Saturn has four main groups of rings and three fainter, narrower ring groups. Close up views of Saturn's rings by the Voyager spacecrafts, which flew by them in 1980 and 1981, showed that these **seven ring groups** are made up of thousands of smaller rings. The exact number is Unknown.

- **SEVEN "spheres" of Planet Earth:**

Earth's "spheres"—atmosphere, hydrosphere, cryosphere, geosphere, pedosphere, biosphere, magnetosphere.

- **SEVEN continents of Planet Earth:**

By convention there are seven continents: Asia, Africa, North America, South America, Europe, Australia, and Antarctica. Some geographers list only six continents, combining Europe and Asia into Eurasia.

- **SEVEN tectonic plates of Planet Earth:**

Depending on how they are defined, there are usually seven or eight "major" plates: African, Antarctic, Eurasian, North American, South American, Pacific, and Indo-Australian. The latter is sometimes subdivided into the Indian and Australian plates.

There are dozens of smaller plates, the seven largest of which are the Arabian, Caribbean, Juan de Fuca, Cocos, Nazca, Philippine Sea and Scotia.

- **SEVEN layers of the Sun:**

The inner layers are the Core, Radiative Zone and Convection Zone. The outer layers are the Photosphere, the Chromosphere, the Transition Region and the Corona.

- **SEVEN layers of the Magnetosphere:**

1) Bow shock. 2) Magnetosheath. 3) Magnetopause. 4) Magnetosphere. 5) Northern tail lobe. 6) Southern tail lobe. 7) Plasmasphere.

- **SEVEN layers of Planet Earth's Atmosphere:**

- **SEVEN layers of the Aura(Human Energy Field(HEF) or The Human Atmosphere)??**

- **SEVEN major chakras/Molecular vortices/Atomic centers of force/Electric generators (Human being)??**

Lines/Tubes of Force as expressed by Michael Faraday, James Clerk Maxwell and others.

- SEVEN Planets in the TRAPPIST-1 System
- SEVEN Wonders of the World
- SEVEN Days of Creation
- SEVEN Days of the Week
- SEVEN Deadly Sins
- SEVEN Virtues:

The Seven virtues which are contrary to the Seven Deadly Sins are identified as chastity, temperance, charity, diligence, patience, kindness, and humility.

- 7+ Dimensions??
